

# LUXORA™

SHOWER WALL PANELS & SURROUNDS

## CARE AND MAINTENANCE GUIDE

### **SURFACE EXPOSURE**

All our LUXORA™ panels have a thin coating to protect the material surface from minor scratches and limited UV exposure. This coating can be observed as the glossy or matte surface on the panels that protect the product. This finish provides a surface that is non-porous and will resist stains, mold, mildew, hardwater deposits and soap scum. Leaving you with a low maintenance tub or shower wall.

### **CLEANING**

Proper care will ensure lasting beauty and low maintenance. Normal cleaning requires a soft cloth or sponge and use of a mild detergent or soap.

Please do not use scouring or abrasive cleaners such as Soft Scrub®, Ajax®, Bartenders Keeper®, etc. Use of these products will void the warranty and dull the finish of the panels, leaving them vulnerable to stains, mold, mildew, hardwater deposits and soap scum. With all products, rinse material immediately after.

Exposure to harsh chemicals such as ammonia, bleach, nail polish, polish remover, paint remover, as well as cleaning with hard or sharp objects should also be avoided as they may also cause permanent damage.

### **NOTES**

Avoid extended exposure to heat sources, such as extremely high temperature water or sauna outlets.

### **SUGGESTED CLEANING PRODUCTS**

Everyday Cleaning & General Stains:

- Mild detergent soaps, such as Dawn® dish soap, or similar products.

### **PRODUCTS TO AVOID**

- Abrasive cleaners (Soft Scrub®, Ajax®, Bartenders Keeper®, etc.)
- Harsh Chemicals (ammonia, bleach, nail polish, polish remover, paint remover, etc.)
- Abrasive pads such as scotch-brite pads or similar can cause permanent damage.
- Strong solvents, thinners, methyl ethyl ketone (MEK), etc.
